For the past several years now the Cooperative has had an interagency agreement with the local Head Start program and over these years from time to time referrals have been made for School Psychologist consultations regarding behavior intervention plans. These referrals have prompted the following question.

**Question: Which School Psychologist does the Coop use when a student from Head Start is referred for behavioral issues?**

**Answer: The district of residence is "matched" to the assignments that S. Psychologist for the school year. The child's home (elementary) school is therefore determined and the S. Psychologist currently assigned to that building becomes the consultant for Head Start.**
